

**Ducted High Head Hydronic Terminal with EC Brushless motor for continuous regulation of fan speed and air flow.  
6,20-22,3 kW**

The new high head ducted units i-HWD2, are equipped with an EC Brushless motor fan of new generation with continuous modulation of the air flow, which ensures better comfort and real energy savings. The possibility of vertical and / or horizontal installation, the small dimensions and the wide range of accessories for the canalization, make these units very flexible in installation and adaptable to any type of system. Thanks to the brushless motor and the internal insulation the i-HWD2 guarantee an operation with high levels of acoustic comfort.

#### Version

DFIO	built-in version, front air intake, horizontal installation
DFIV	built-in version, front air intake, vertical installation
DLIO	built-in version, low air intake, horizontal installation
