

BDS BACK DRAUGHT SHUTTER AIR MANAGEMENT SYSTEMS

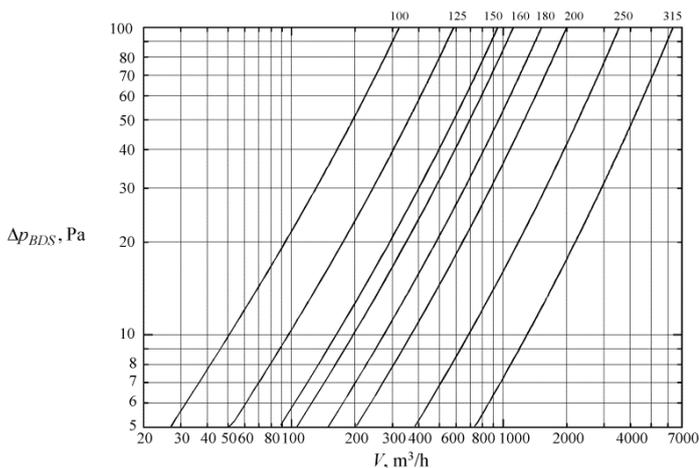

PRODUCT PROPERTIES

The butterfly shutter type **BDS** is used to preventing the reverse of air-flow in circular duct systems.

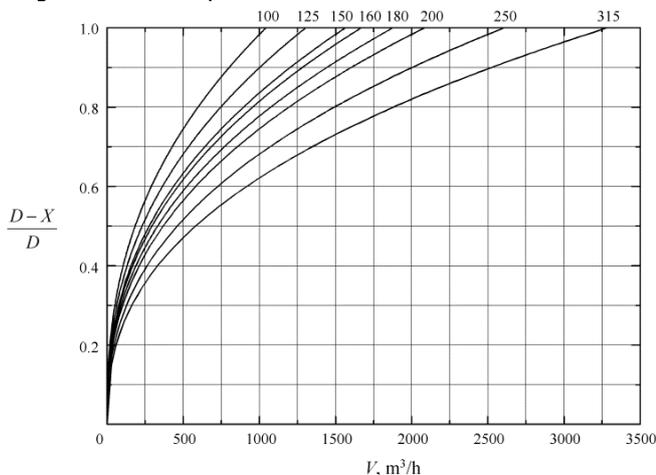

CONSTRUCTION

The casing of the BDS has been constructed from galvanised steel. The blades are made of aluminium. The shaft and the spring are made of stainless steel. The butterfly shutter is fitted with a return spring, which closes the blades onto a sound absorbing ring. Nominal diameters correspond to those in DIN 24145. For production range and main dimensions see the tables.

PRESSURELOSS

Opening of the butterfly blades as the function of air flow rate

INSTALLATION

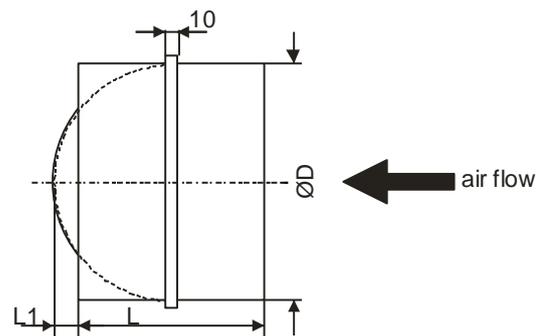

It is recommended to install the shutter into horizontal ducting. The shaft axis must be vertical. The shutter is installed into the duct by simple slide-in.

OPERATION CONDITIONS

The shutter is destined for operation in a standard environment with ambient temperature up to 60°C, for transportation of clean air free of coarse dust, grease, chemical vapors and other impurities.
